J-Series Aerating Fountains

The least expensive fountains to purchase, maintain and operate!

Multiple spray
patterns for the
price of one!

For more than four decades, Kasco has manufactured aeration products proudly in the U.S.A. Our customer-focused philosophy ensures that you get superior performance at a great value. Kasco J-Series Aerating Fountains improve the overall water quality of your pond, while enhancing its appearance with *interchangeable spray patterns* — *included in the fountain price!*

Kasco J-Series Aerating Fountains are:

the least expensive to purchase, maintain and operate — providing the best value on the dollar!

versatile — get multiple, interchangeable spray patterns for the price of one!

3/4 hp = 5 patterns; 2 hp and 3 hp = 6 patterns

5 hp = 7 patterns

complete with everything you need — nozzles to create multiple decorative spray patterns, control panel with Ground Fault Interrupter and photo-eye for optional light kit, power cord (available in 50' increments up to 200'; or up to 250' for 240V models), and mooring lines.

industrial strength — designed with heavy-duty stainless steel components for continuous operation, extended motor life and corrosion prevention (even in salt water.)

energy efficient — 1750 rpm motors mean lower power consumption and longer life for seals and bearings. Compare Kasco's amp draws to competitive units and see what you save on your monthly power bill.

highly dependable — units are designed to operate continuously with minimal maintenance, even in shallow water. They are the least likely fountains to clog of any manufacturer because of Kasco's deflector technology, prop guard and standard bottom intake screen.

easy to use and install — fountains are easy to install, move and operate. Spray nozzles are easily switched within 30 seconds.

compliant and warranted — Kasco fountains are approved to UL and CSA standards by ETL as complete packages. Each fountain comes with a 2-year manufacturer's warranty.

Proudly made in the U.S.A.

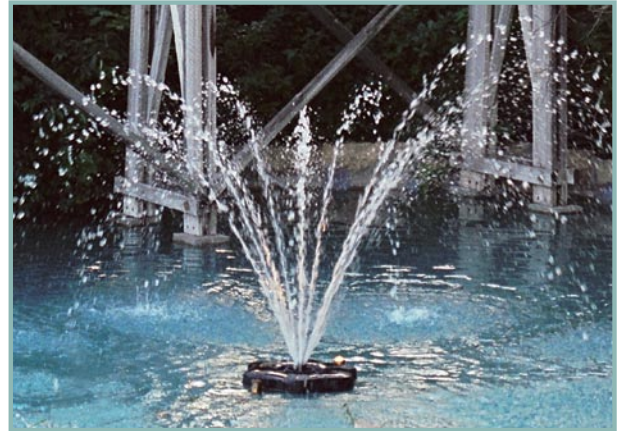

Approved to UL and CSA standards as a complete package

All products are designed to ship by UPS at the best rate and delivery schedule

A Linden pattern with lighting

B Cypress pattern

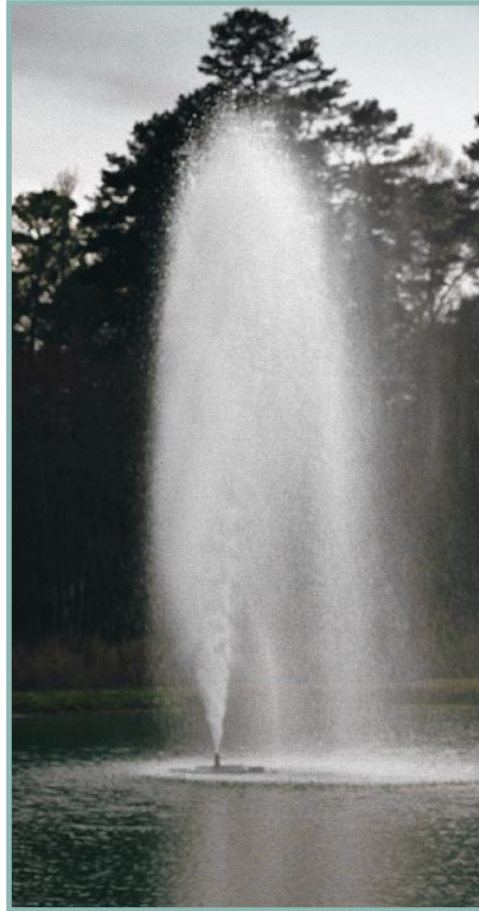

C Willow pattern

* 120V units are available with power cords up to 200' in 50' increments. 240V units are available with power cords up to 250' in 50' increments (50' power cord not available for 5 HP units.)

** +/- 10% depending on nozzle used.

Optional Light Kit Adds Beauty

Kasco J-Series Fountains are available with an optional decorative 2- or 3-light kit to add beauty and interest to your aerated pond. The superior design of Kasco lighting sets a new quality standard that competitors attempt to achieve!

J-Series Fountains use three clear MR-16 bulbs (75-watt) or three colored bulbs (50-watt) in red, green, blue or yellow.

- Kasco lights require only partial submergence. Partial submergence provides great lighting and requires less wattage than competitive units that must be fully submerged. Greater light penetration per watt results in lower operating costs.
- Lights convert to 12-volt from 120-volt (via a junction box on the float) to provide a brighter display.
- Light fixtures are made from solid bronze and include clear lenses, internal potting materials with thermal overload protection, and multiple seals.
- Note: 3/4 HP fountains can use a 2-light kit (Part #: LR275). All other fountains can use a 3-light kit (Part #: LR375).

The 3 HP and 5 HP fountains can accept an additional light kit (totalling 6 lights) by ordering two # LR375 kits and mounting hardware (Part #: 840322).

Power Control Conserves Energy

J-Series 120V fountains come standard with a C-25 Ground Fault Circuit Interrupter (GFCI) in a rain-tight enclosure with 24-hour timer and photo sensor for the optional light kits.

J-Series 240V fountains come with a timer, GFCI protection for the fountain and 120V GFCI protected outlet with photo sensor.

Other Kasco Products for Managing Water Quality

- **1/4 hp J-Series Fountains** decorate small water gardens and reflection pools with a stunning center display. Ideal for ponds up to 1/5 acre.
- **V-Series Aerating Fountains** provide the highest oxygen transfer rate with a pleasing "V" display pattern and are available in 1/2, 3/4, 1 and 2 hp.
- **Pond Aerators** provide the highest oxygen transfer rate at the lowest operating cost.
- **Water Circulators** create flow in calm, stagnant waterways. Can also be used to prevent ice formation or winterkills due to low oxygen levels.
- **Macro-Zyme™ Beneficial Bacteria** naturally cleans your pond, reducing odor and organic sludge. (Also available to help maintain septic systems.)
